3. Design Considerations

Durability

The ThruColour Panels are fabricated in our factory based in Perth, WA. PAA has utilized high quality Compressed Fibre Cement and other locally sourced material for the products availability and quality control. The ThruColour Panels are completely sealed on both sides and all edges.

Fire Resistance

Tested and passed the Early Fire Hazard Property criteria in compliance with AN/NZS 1530.3 and AS/NZS 3837 and is deemed a Group 1 material in accordance with BCA, Volume 1.

Full external wall system comply with AS 5113:2016 & AS ISO 9705:2003 fire performance.
